FEEDING FIELD DOG & GAME

Because Field Dog & Game has been made with high quality ingredients which are highly digestible and nutritious, smaller amounts may be needed unlike most other complete foods. Feed your dog a daily amount according to your dogs energy level and body weight, subtract or add 10% over 3-4 weeks until the dogs weight has stabilized. Field Dog & Game may be fed as a dry food except during weaning, when a small amount of moisture is helpful and always supply lots of fresh water.

The addition of supplements should never be necessary and could prove harmful unless advised by your veterinary surgeon.

13 VITAMINS & 12 MINERALS FOR PEAK CONDITION

All 25 essential vitamins and minerals are included in each of the recipes.

The amounts are carefully balanced for the different life stages and lifestyles and help ensure top condition seen in a glossy coat, bright eyes and healthy teeth and gums. The range of Field Dog & Game is a complete balanced food and it is not recommended that vitamin or mineral supplements are used.

WHAT DOES TOTAL NOURISHMENT MEAN FOR YOUR DOG?

Total nourishment begins with the highest quality ingredients selected for their nutritional value, taste and digestibility. These are blended together in the correct balance to help ensure that your dog receives all the essential nutrients needed for overall health, fitness, vitality and condition.

NUTRITIOUS INGREDIENTS FOR ALL THE ESSENTIAL NUTRIENTS

Field dog & Game uses only the finest quality ingredients providing all that your dog needs for a carefully balanced and highly digestible diet that contains no artificial flavours or colourings. The main source of protein is produced from fresh chicken and is a most valuable source of the essential amino acids needed for bone structure and strong supple muscles. The careful blend of fats and oils from vegetable and animal sources provide the essential fatty acids for healthy skin and coat. Carbohydrate from cereal source providing instant energy.

EASILY DIGESTIBLE FOR MAXIMUM BENEFIT

Field Dog & Game has a high digestibility (measured at around 84%) which means that Field Dog & Game is far easier for your dogs digestive system to utilize and make the most of nutrients available in the food. Your dog may require smaller amounts of food than a pet food of a lower grade to help stay in peak condition. As a result, stools will be smaller, more convenient for you and good for the environment.
